

Unit 5: DNA and Protein Synthesis

Title: Nucleic Acids Structure and Function

Essential Question: What are the structures and functions of DNA and RNA

What is the function of DNA?	
Draw and label a nucleotide	
What determines the identity of a nitrogen base?	
How are nucleotides linked?	
Which bases pair?	
What shape is DNA?	
Where in the cell is DNA found?	
What is the function of RNA?	
What base does RNA use instead of thymine?	
What is the structure of RNA?	
Where in the cell is RNA located?
